

KINNAMMI

Resilient Data Everywhere

HYBRID DATA FABRIC FOR THE CONNECTED WORLD

NGA ACCELERATOR – JUNE 24, 2021

DATA IS INCREASINGLY DISTRIBUTED AT THE EDGE

Devices at the computing edge

“**75%** of data at the edge by 2025
– Gartner”

Edge
computing
needed for:

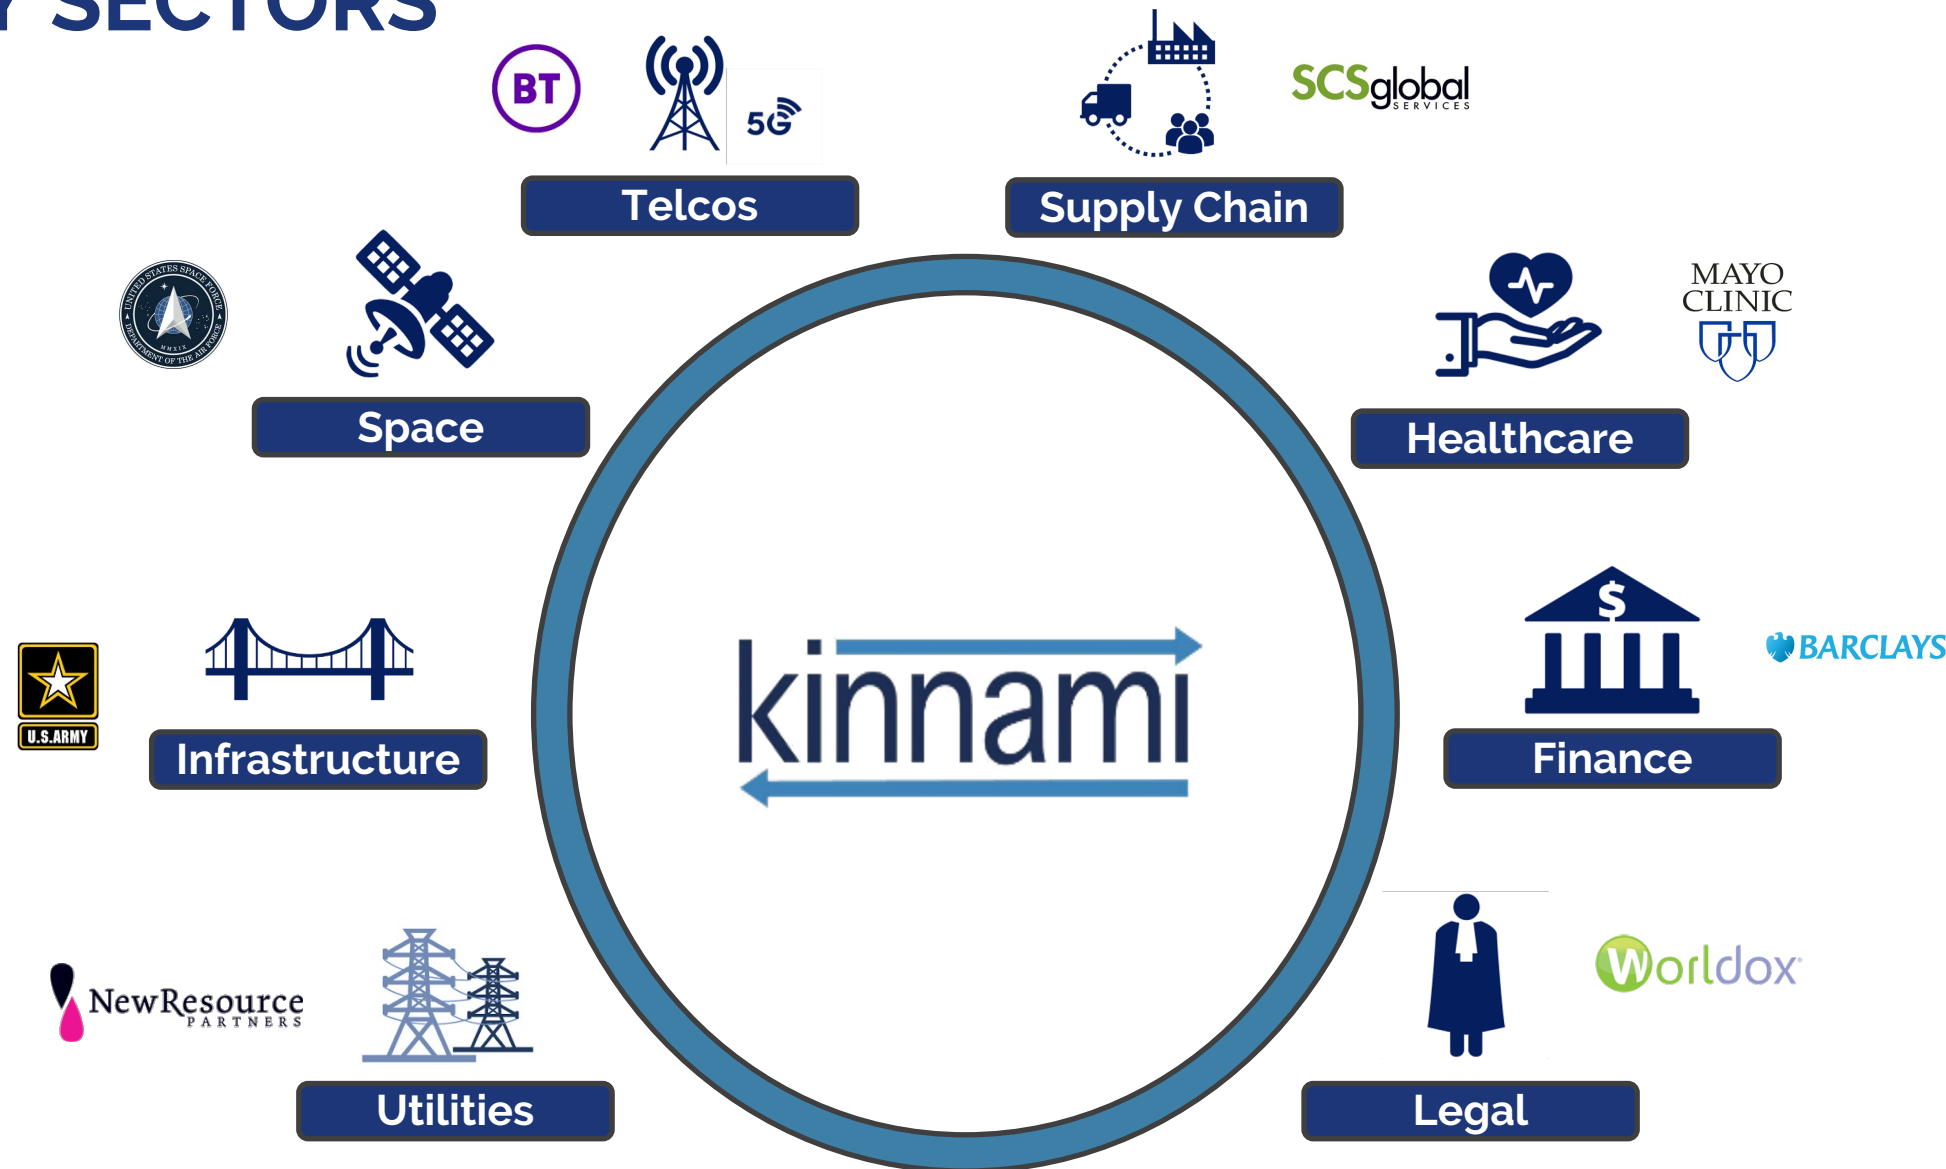

Real-time processing

Large volumes of data

Autonomous operations

HANDLING EDGE DATA IS A CHALLENGE FOR MANY SECTORS

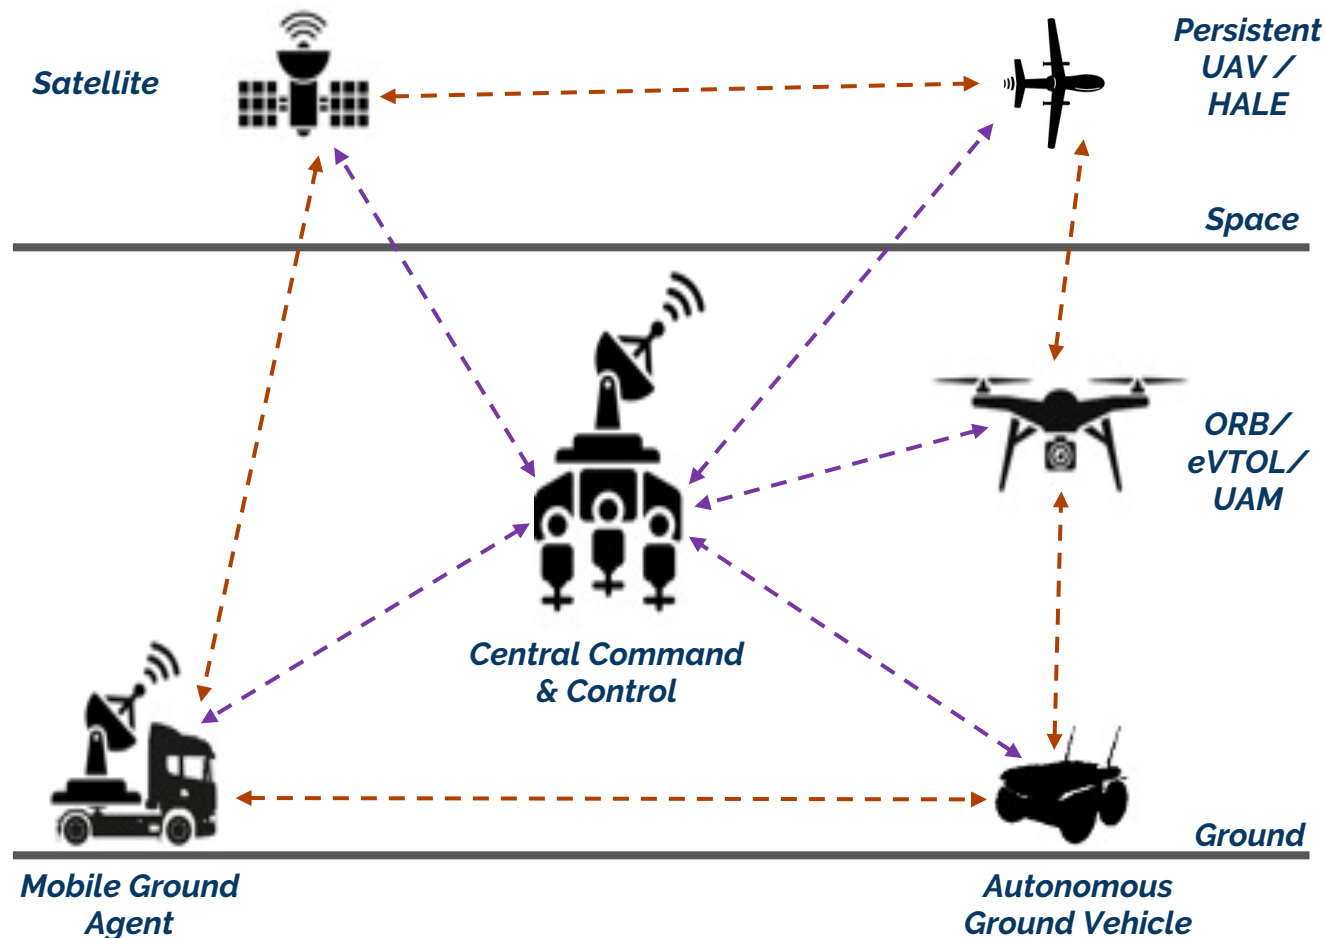

HELPING THE U.S. AIR FORCE DEVELOP SECURE AIR DATA NETWORKS

KINN△MI

Distributed Air Data Networks for Autonomy

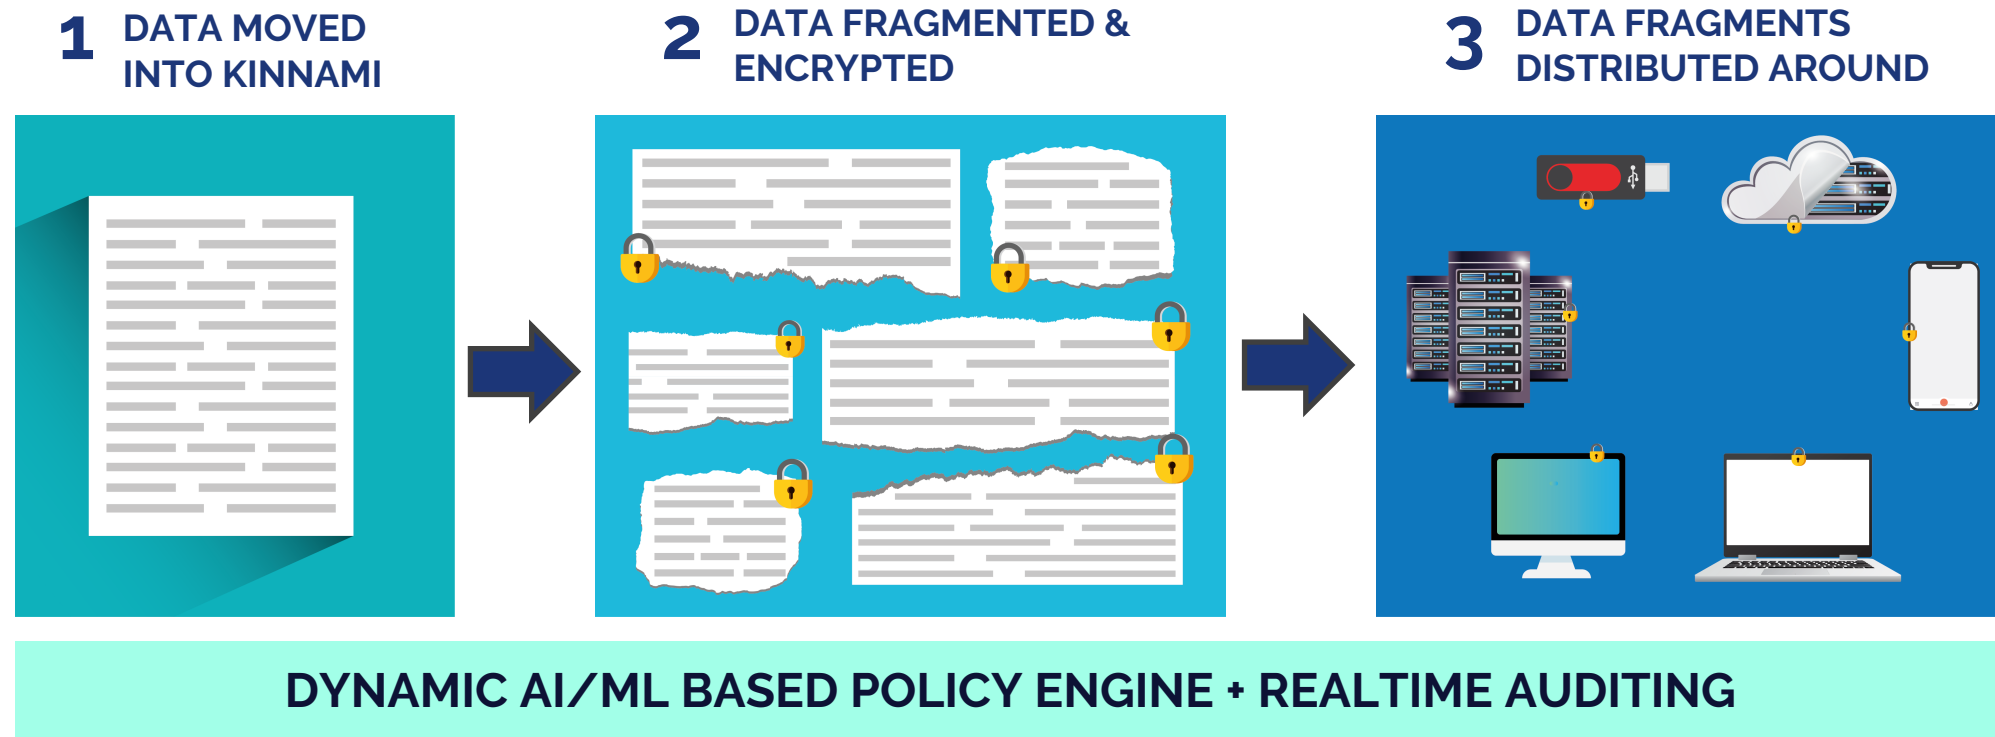

IT DEPARTMENTS CANNOT IGNORE THE EDGE ANYMORE

**Existing Patchwork of IT Solutions
Will Not Work
for Secure Data Management
at the Edge!**

- ⌘ Millions & billions of devices
- ⌘ Devices not physically secure
- ⌘ Network reliability not guaranteed
- ⌘ IT resources are not always available

OUR UNIQUE SOLUTION: DISTRIBUTED P2P DATA MANAGEMENT & SECURITY SOFTWARE

KINNAMI

CURRENT DoD USE CASES

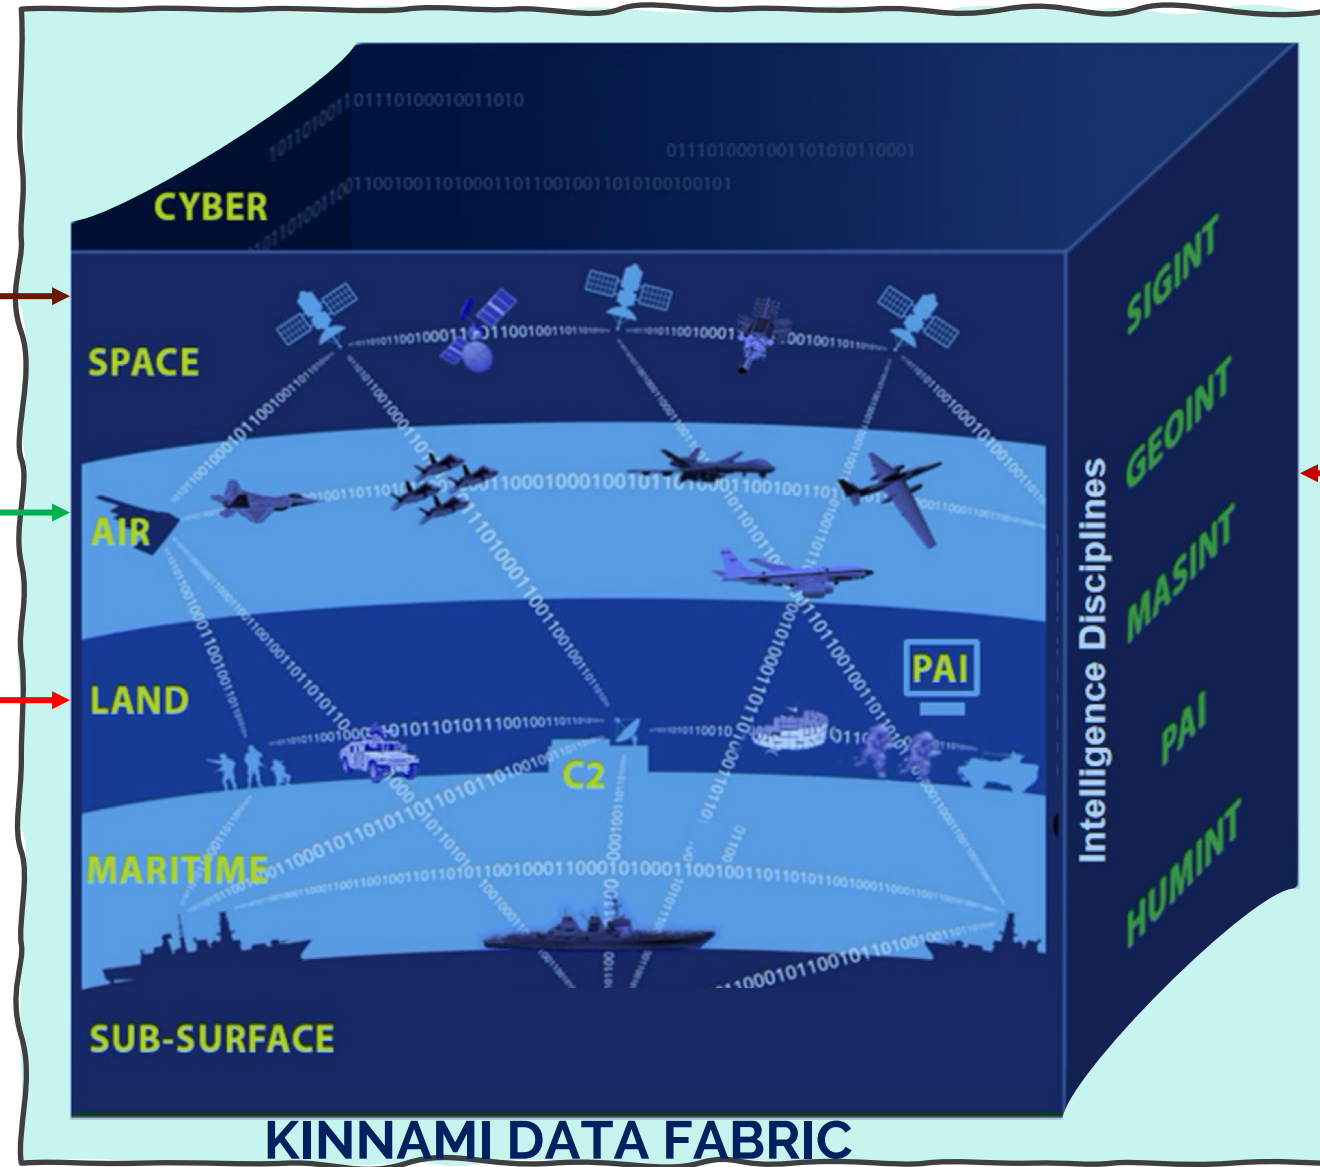

KINNAMI

➤ Secure space data sharing

➤ Secure air data networks

➤ Sensor data infrastructure

➤ Digital engineering data management

SUPPORTING NGA MISSION NEEDS

KINN△MI

Data Sharing

- ✓ Near-Real Time Operational GEOINT Data Updates (SFG)
- ✓ Near Real-time Delivery of Mission Critical Data to Edge (SFA, SFH, SFD, TDOC)
- ✓ Data Collaboration w/ External Partners – NASA, Commercial Cos (SF)

Multi-Level Security

- ✓ Near Real-time Geo-Fencing for Classified Information (N2W-R)

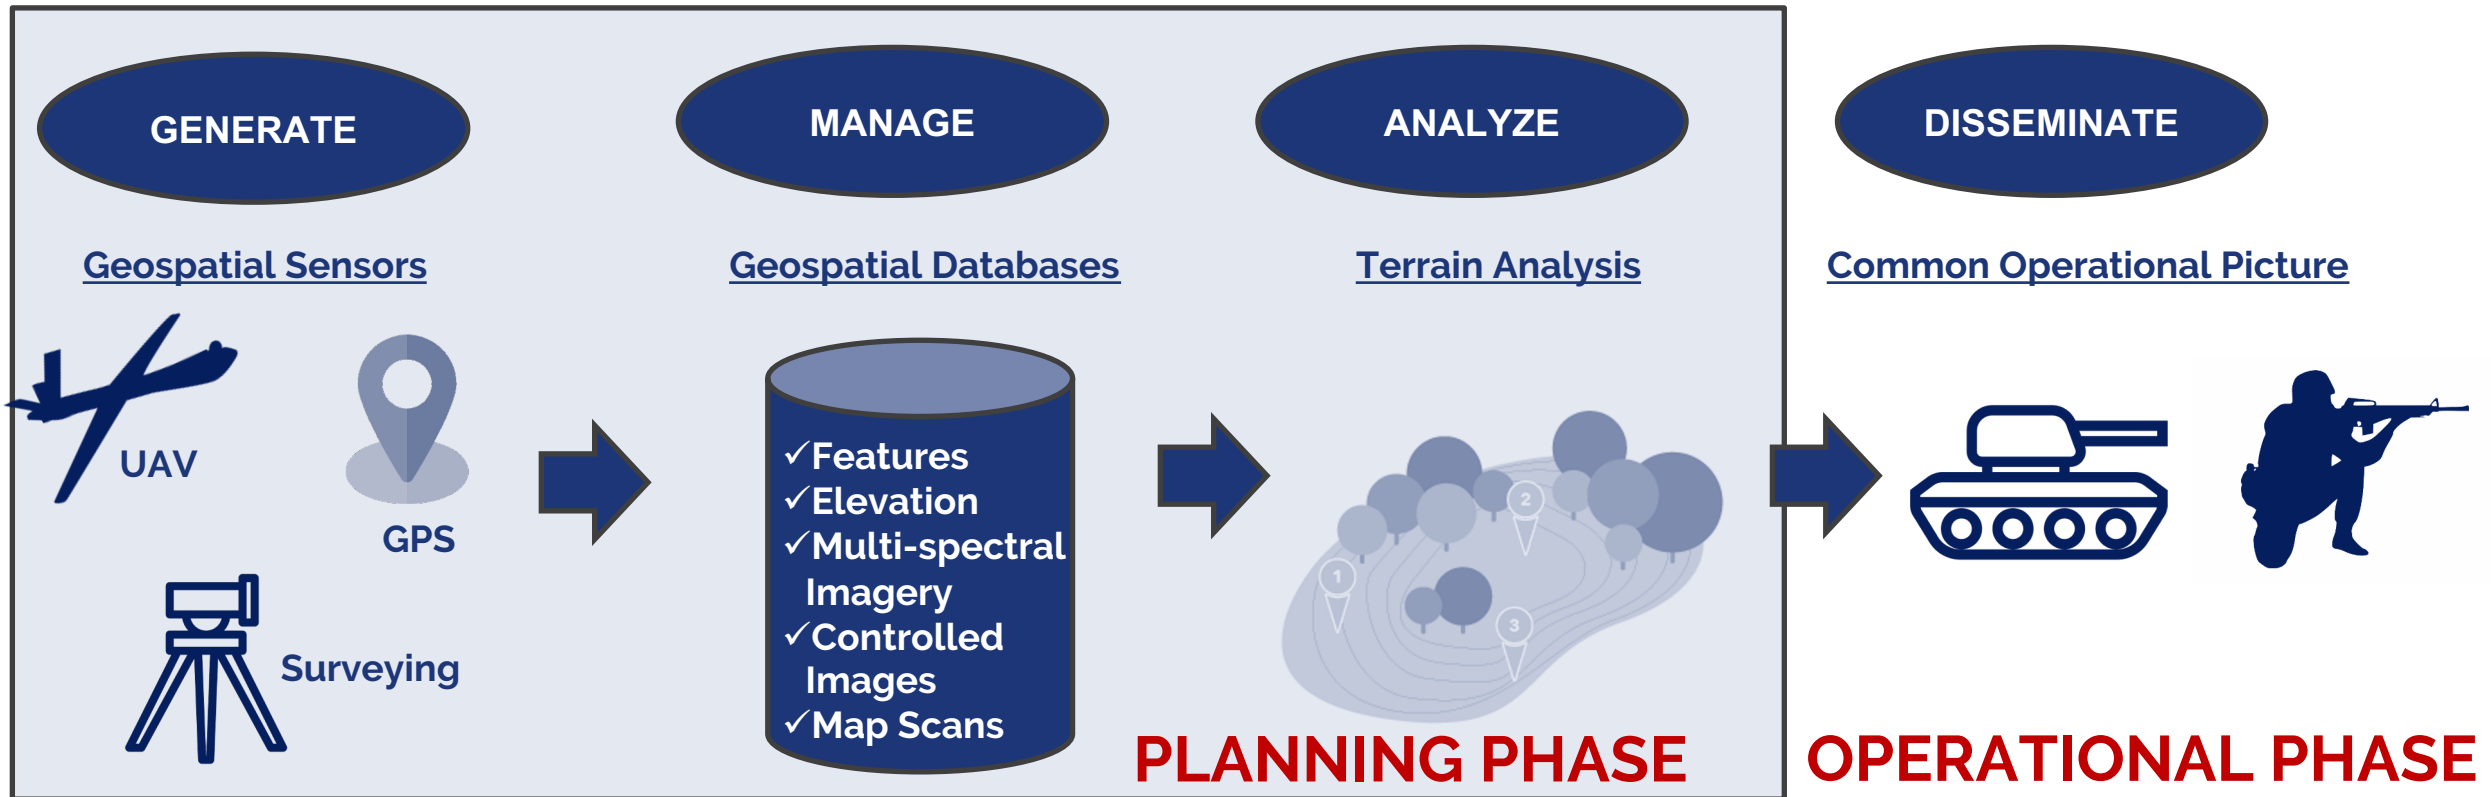

Chain of Custody

- ✓ Automatic Cradle to Grave Immutable Records Management & Tracking (SF)

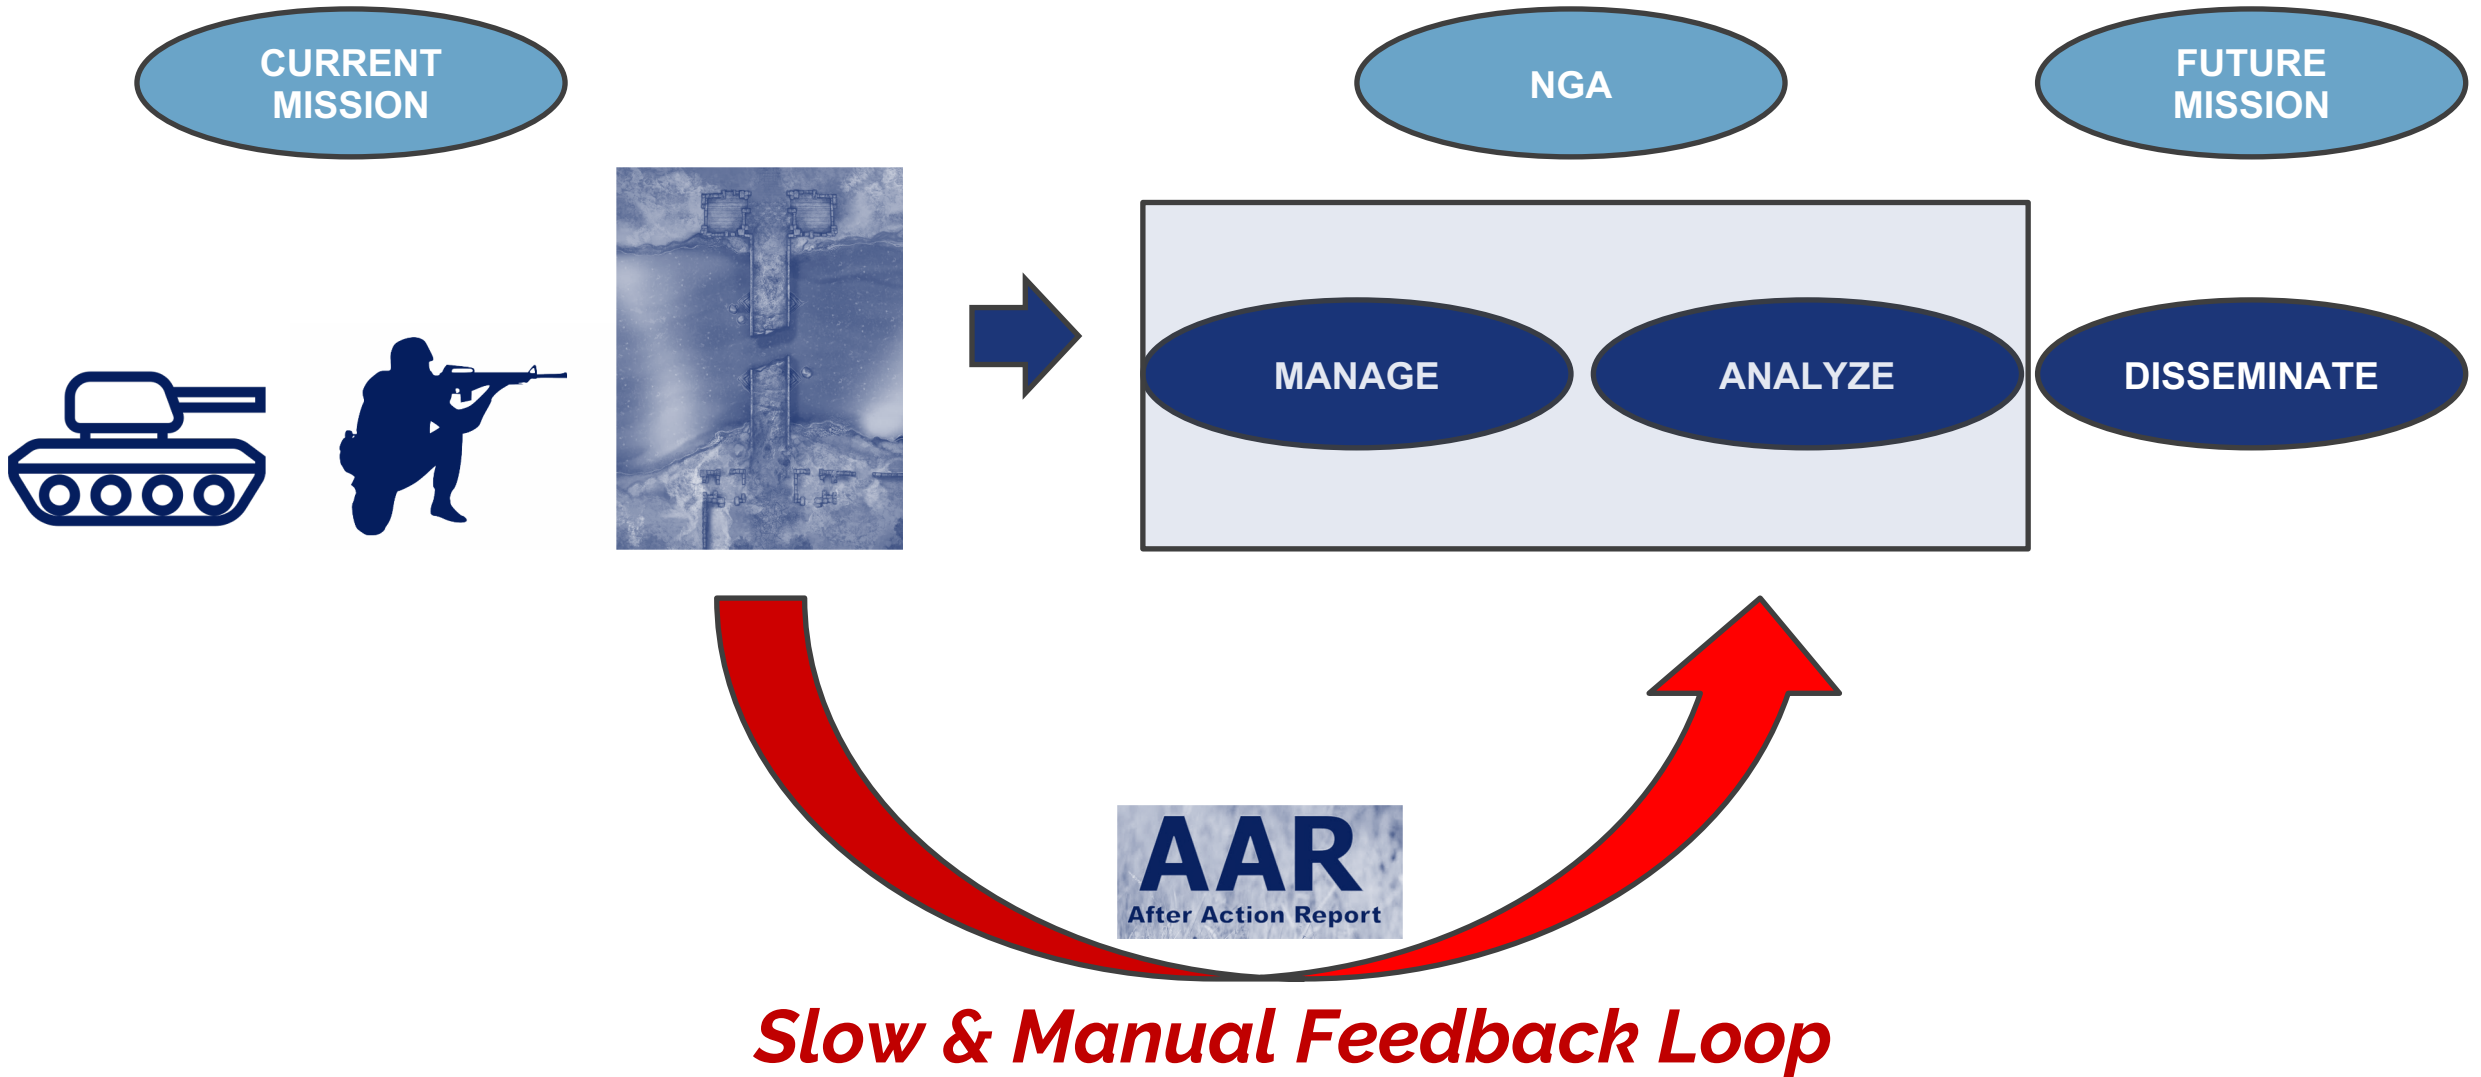

NEAR REAL-TIME GEOINT DATA UPDATES DURING MISSIONS

KINN△MI

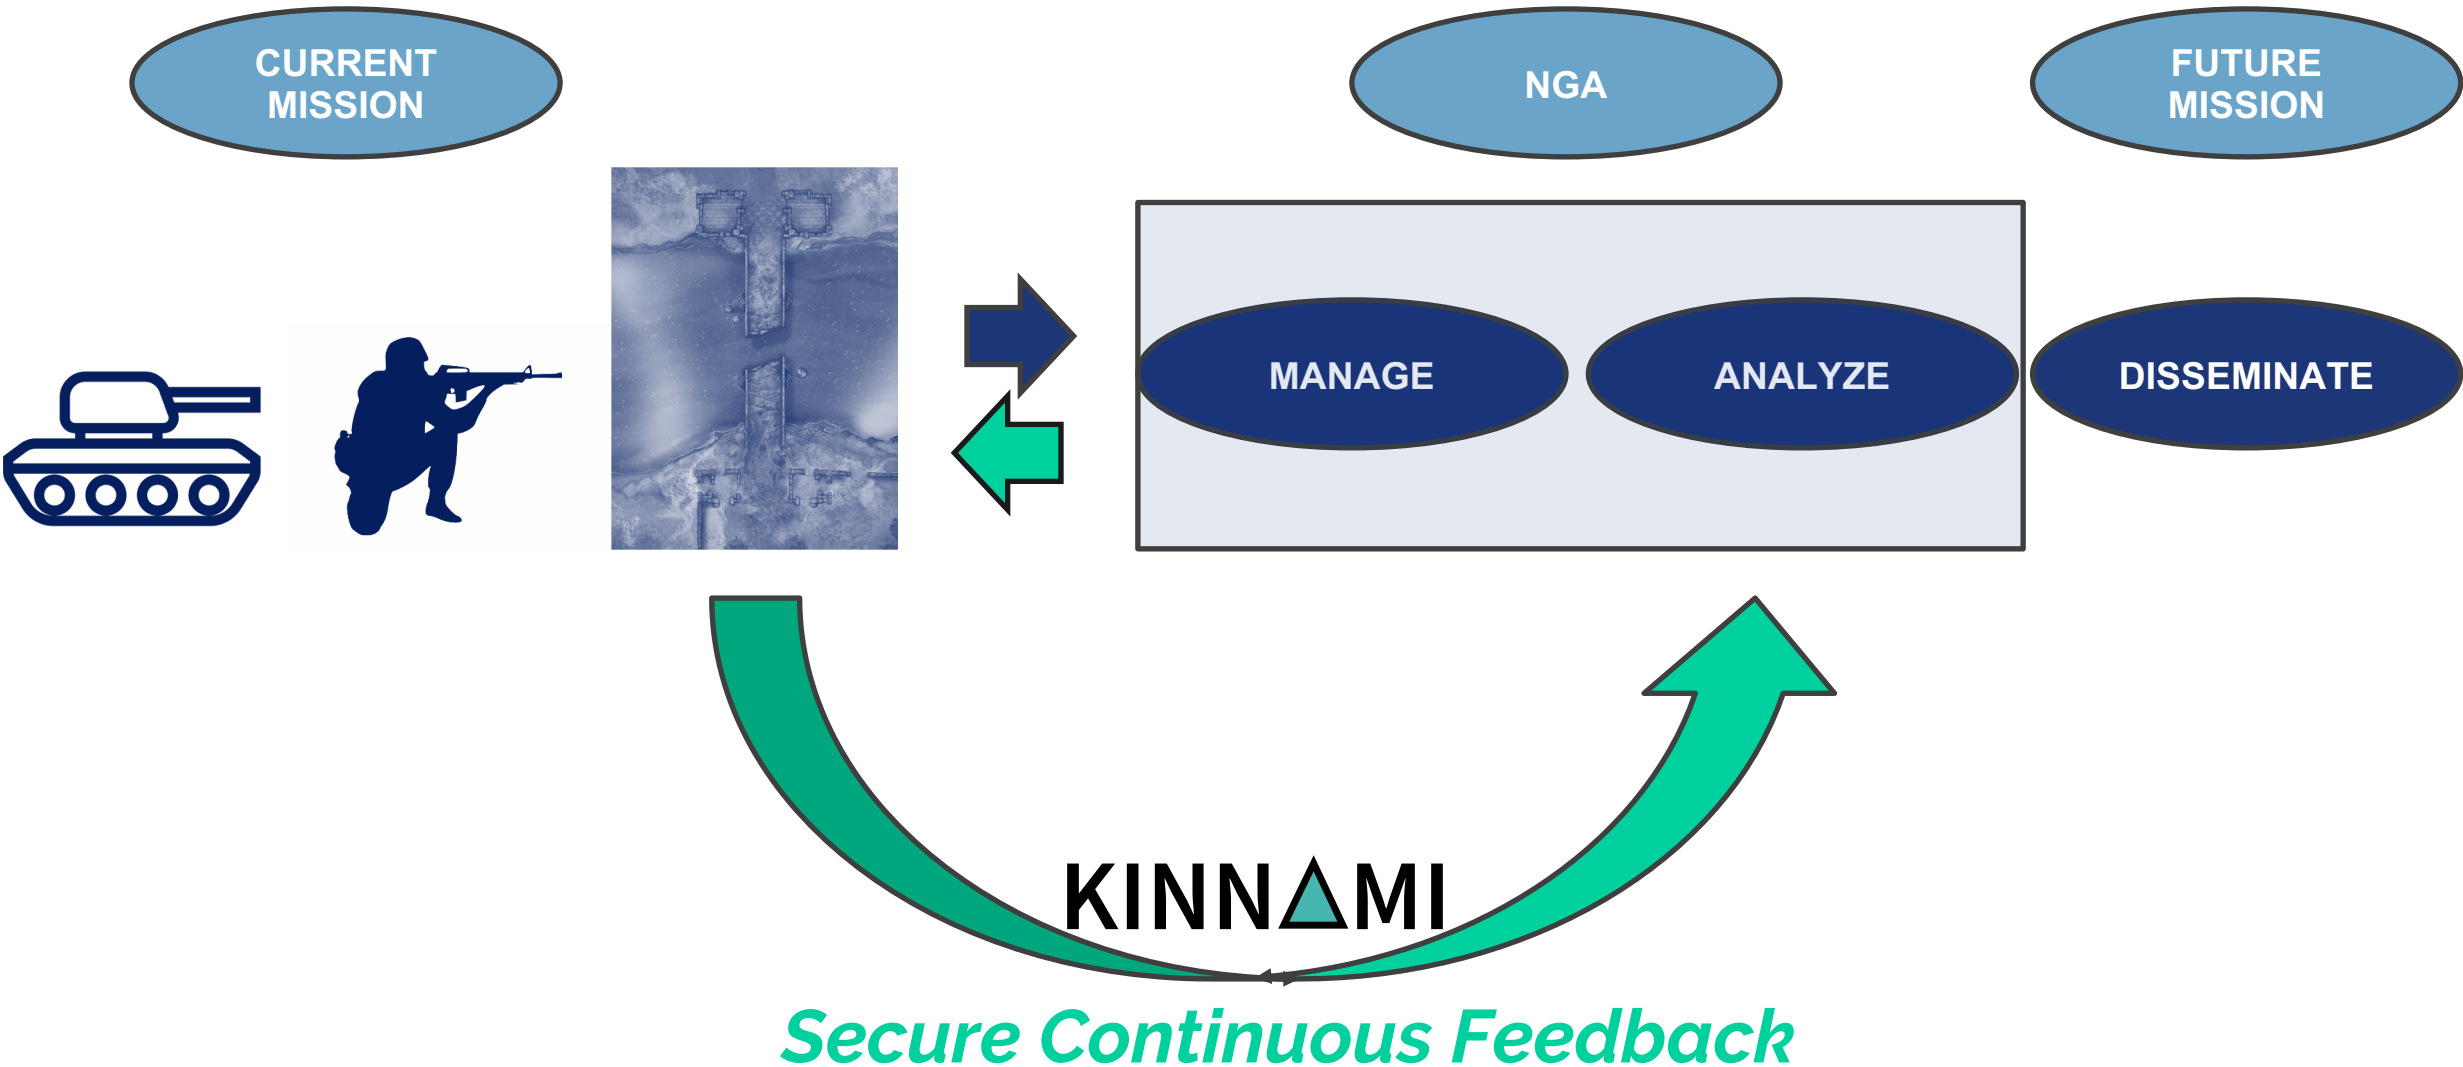

NEAR REAL-TIME GEOINT DATA UPDATES DURING MISSIONS

KINN△MI

NEAR REAL-TIME GEOINT DATA UPDATES DURING MISSIONS

KINNΔMI

KINNAMI UNIQUELY BRINGS RESILIENT DATA MANAGEMENT TO EDGE COMPUTING

STORAGE SOLUTIONS

KINNAMI
